

Initial discussion on IPARD III

Group 1

Which measures to keep in the future?

In addition to already entrusted(1,3,7,9), there is a plan to use:

- Rural infrastructure
- LEADER
- Green agriculture – agri-environment, climate change and organic agriculture
- Advisory services
- Training
- Forestry

What are the measures to be dropped/ kept as reserve?

- Producer Groups

Would you see opportunity for new measures?

- Short value chains – support to adding value and integration of the product locally (could be considered as part of the Measure 7)
- Agriculture Research/ Education infrastructure/ innovation, new technology – maintenance of agriculture research institutes (potential difficulty to define the indicators)
- Agro-biodiversity/ compensation for potential loss/protection of genetic resources in agriculture to be considered as part of the agri-environmental measures
- Agro-Tourism as separate measure ???
