EA Policy for the Accreditation of Organic Production Certification

- New system of compliance for product imported in EU

Since 1st January 2022, Certification Bodies can apply accreditation for compliance system before asking recognition to the European Commission. Special procedure is detailed by the Regulation (EU) 2021/1698 and explained in §4 of EA-3/12, because the technical dossier of recognition shall contain accreditation reports elaborated by Accreditation Bodies, signatories of the IAF MLA.

- Transition between Equivalency and Compliance systems

If a Certification Body accredited and recognized for organic production in third countries for equivalency system applies accreditation for compliance system, the technical dossier of recognition application can consider witnesses carried out by Accreditation Bodies under Regulation (EC) No 834/2007 under equivalency system. The conditions are listed in § 4.8 of EA-3/12 document.

- Expiration of equivalency recognition

Any accreditation granted for the current equivalency approach shall be upheld until the end of the legal transition period of the new regulation, **the 31st December 2023**. At this date, the accreditation for equivalency purpose would be withdrawn.
